2017 MISSOURI LEGISLATIVE AGENDA

The HBA's 2017 Missouri Legislative Agenda includes long-standing policy issues that are important to HBA members and key to a strong housing industry. The HBA Government Affairs Committee will continue to monitor legislation and recommend policy positions as necessary.

TOP PRIORITIES

Taxes: The HBA opposes any changes to state tax policy that adversely impacts economic growth and homeownership, including but not limited to, efforts to eliminate the state mortgage interest and property tax deductions.

Workers Compensation Reform: The HBA supports the requirement that all on-site employees in the construction industry are covered by workers' compensation insurance.

Workforce Development: The HBA supports efforts to promote and enhance workforce education and training programs, and to identify funding opportunities to help the building industry recruit, train and retain its workers.

IMPORTANT PRIORITES

Licensing: The HBA opposes state license and/or registration legislation for home builders. The HBA believes licensure is best addressed at the local level.

Building Codes: The HBA opposes any legislation creating a uniform statewide building code, energy code, or comprehensive energy plan.

Sustainable Building: The HBA supports initiatives to promote the use of sustainable building technology in residential construction. The HBA supports flexibility in guidelines and certification programs that include voluntary ANSI approved standards, such as the National Green Building Standard (ICC 700). ICC 700 is recognized as the only ANSI approved standard for residential construction of Green or Sustainable homes by the National Association of Home Builders (NAHB), ICC and ASHRAE.

Growth Management: The HBA opposes limits on new development, including impact fees, urban growth boundaries and excise taxes.

Education Funding: While recognizing the connection between economic development and quality education, the HBA supports funding based on actual costs, administrative consolidation and further expansion of local funding options.

Transportation: The HBA generally supports investments in transportation infrastructure.

Immigration: The HBA urges the state to support the federal government in creating a new visa system whereby more immigrants can legally enter the residential construction workforce each year and be put on the path to temporary or permanent legal residency or citizenship.

Federal Regulation: The HBA urges local and state governments to join the HBA in supporting critical federal legislation, such as housing finance reform, and opposing federal regulation that adversely impacts the home building industry and hampers economic growth, such as the Waters of the U.S. rule, the Endangered Species Act, and other burdensome U.S. Environmental Protection Agency and Army Corps of Engineers regulations.
